Trinidad and Tobago COVID-19 (Novel Coronavirus) Update # 124

Port-of-Spain, April 21, 2020: As part of the national drive to safeguard the health of the Trinidad and Tobago population in the face of the global COVID-19 outbreak, the Ministry of Health continues to provide up-to-date information on the country's status in this regard.

The Ministry of Health provides the following clinical update as of the **morning of Tuesday 21st April 2020:**

Number of samples submitted to the Caribbean Public Health Agency (CARPHA) for testing for COVID-19	1380
Number of samples which have tested positive	114
Number of deaths	8
Number of persons discharged	26

The Ministry of Health provides the following update of achievements over the last 24 hours:

- Twenty-three patients (Couva Hospital) were decanted to the step down facility at the Home of Football, Couva. All patients are asymptomatic, stable and low risk.
- No patient is currently in the Intensive Care Unit (ICU).
- No patient is currently in the High Dependency Unit (HDU). One patient, who was in HDU yesterday, is now ambulatory.

COVID-19 Patients in Step-down/ Transition Facilities

Sangre Grande Centre (Brooklyn Facility) - 21 <ul style="list-style-type: none">• All are low risk, stable patients.
Home of Football, Couva – 23 <ul style="list-style-type: none">• All are low risk, stable patients

Intensive Care Units (ICUs) are hospital wards that provide treatment for people who are very ill. They are staffed with health care professionals who are trained in ICU treatment and the use of sophisticated monitoring equipment.

High Dependency Units (HDUs) are wards for people who need more observation, treatment and nursing care than is possible in a general ward but slightly less than that given in an Intensive Care Unit.

An Ambulatory Patient is able to walk about and is not bedridden.
