Trinidad and Tobago COVID-19 (Novel Coronavirus) Update # 186

Port-of-Spain, May 11, 2020: As part of the national drive to safeguard the health of the Trinidad and Tobago population in the face of the global COVID-19 outbreak, the Ministry of Health continues to provide up-to-date information on the country's status in this regard.

As of the **night of Monday, 11th May, 2020** the Ministry reports the following:

Number of samples submitted to the Caribbean Public Health Agency (CARPHA) and UWI site for testing for COVID-19	2334
Number of samples which have tested positive	116
Number of deaths	8
Number of persons discharged	107

Of the total number of positive cases, 52 of these positive cases came from the group of nationals who recently returned from a cruise:

- 49 positive cases from the group of 68 nationals who returned from the cruise together
- 3 positive cases from the group of nationals who returned from the same cruise separately from the other 68 nationals.

The Ministry of Health reminds the public that COVID-19 can be spread by touching surfaces that are contaminated with the novel coronavirus. It is important to regularly sanitise commonly touched surfaces (e.g. table tops, handrails, door knobs and trolleys). If dirty, they should be cleaned using a detergent or soap and water prior to sanitization. A simple solution of 1/3 cup of household bleach to one gallon of water is quite effective.

The important elements of sanitisation are disinfecting frequently and thoroughly, and using the cleaning product correctly.

The public is also strongly advised to take the following personal hygiene measures to protect themselves and their loved ones from COVID-19:

- Cover your nose and mouth with a tissue when you cough or sneeze
 - Dispose of tissue immediately after using
 - Cough and sneeze into the crook of your elbow if you do not have a tissue
- Stay home if you are ill
- Sanitize hard surfaces (e.g. table tops, handrails, doorknobs and trolleys) as often as possible.
- Avoid close contact with people who have flu-like symptoms
- Practise social distancing
 - Maintain at least 2 metres (approximately 6 feet) distance between yourself and others, especially anyone who is coughing or showing signs of flu-like illness.

It is also advised that all public transportation vehicles should operate with windows open and limit their occupancy.

The Ministry will continue to provide accurate information to the public in a timely fashion. The public is therefore urged to disregard and avoid sharing all unconfirmed, misleading and/or false information about COVID-19 (formerly Novel Coronavirus).
