#### Trinidad and Tobago COVID-19 (Novel Coronavirus) Update # 356

**Port-of-Spain, July 25, 2020:** As part of the national drive to safeguard the health of the Trinidad and Tobago population in the face of the global COVID-19 outbreak, the Ministry of Health continues to provide up-to-date information on the country's status in this regard.

**The Ministry of Health reminds the population to source your information only from official sources, such as the Ministry of Health or Ministry of Communications.**

As of the **morning of Saturday, 25<sup>th</sup> July, 2020** the Ministry reports the following:

<b>Number of samples submitted to the Caribbean Public Health Agency (CARPHA) and UWI site for testing for COVID-19</b>	<b>6500</b>
<b>Number of unique patient tests completed</b>	<b>4967</b>
<b>Number of repeated tests</b>	<b>1533</b>
<b>Number of samples which have tested positive</b>	<b>147</b>
<b>Number of deaths</b>	<b>8</b>
<b>Number of persons discharged</b>	<b>128</b>

The Ministry of Health provides the following update:

- Five (5) additional persons have tested positive for COVID-19. All five cases are primary contacts of a recently positive COVID-19 patient. All established protocols have been implemented.

**COVID-19 Positive Patients in Hospital – (6) – Caura Hospital. Five (5) new patients are en route to Caura hospital.**

## **COVID-19 Positive Patients in Step-down / Transition Facilities – (0)**

Intensive Care Units (ICUs) are hospital wards that provide treatment for people who are very ill. They are staffed with health care professionals who are trained in ICU treatment and the use of sophisticated monitoring equipment.

High Dependency Units (HDUs) are wards for people who need more observation, treatment and nursing care than is possible in a general ward but slightly less than that given in an Intensive Care Unit.

An Ambulatory Patient is able to walk about and is not bedridden.
